

**JAPAN SMALLER
CAPITALIZATION FUND, INC.**

**ANNUAL REPORT
FEBRUARY 28, 2022**

JAPAN SMALLER CAPITALIZATION FUND, INC.

April 29, 2022

To Our Shareholders:

We present the Annual Report of Japan Smaller Capitalization Fund, Inc. (the “Fund”) for the fiscal year ended February 28, 2022.

The net asset value (“NAV”) per share of the Fund decreased by 5.4% and the closing market price of the Fund (on the New York Stock Exchange) decreased by 8.6% after giving effect to the reinvestment of income dividends, ordinary income distributions, and long-term capital gain distributions for the fiscal year ended February 28, 2022. The closing market price of the Fund on February 28, 2022 was \$7.63, representing a discount of 15.1% to the NAV of \$8.99. The net assets of the Fund totaled \$254,646,580 on February 28, 2022.

The Russell/Nomura Small Cap™ Index, the Fund’s benchmark (“Benchmark”), decreased by 5.9% in United States (“U.S.”) dollar terms. During the fiscal year ended February 28, 2022, the Fund outperformed the Benchmark by 0.5% on a NAV basis. The Tokyo Price Index (the “TOPIX”), a capitalization-weighted index of all companies listed on the First Section of the Tokyo Stock Exchange (the “TSE”), decreased by 6.2% and the Nikkei Stock Average Index (“Nikkei”), a price-weighted index of the 225 leading stocks on the TSE, decreased by 15.1% in U.S. dollar terms for the fiscal year ended February 28, 2022. The Japanese yen (“Yen”) depreciated by 7.9% against the U.S. dollar during the fiscal year ended February 28, 2022.

For the quarter ended February 28, 2022, the Benchmark decreased by 2.6%, the TOPIX decreased by 3.8%, and the Nikkei decreased by 6.2% in U.S. dollar terms. The NAV of the Fund increased by 3.1% and outperformed the Benchmark by 5.7%. The closing market price of the Fund increased by 2.6% and the Yen depreciated by 1.7% against the U.S. dollar during the quarter ended February 28, 2022.

Investment Strategy

The Fund aims to invest in undervalued stocks that offer fundamental strength and potential for improvement. The Fund performs extensive fundamental research to identify stocks that can create shareholder value. The Fund focuses on companies that are leaders in certain niche markets, companies with large or expanding market shares, stocks with superior shareholder distribution policies, and stocks that offer good growth prospects. In the Japanese small cap equity market, valuation anomalies do exist and can be exploited through active management. There are a number of factors that the Fund considers when selling an investment including a stock which appears fully valued, unexpected deterioration in earnings or a substantial loss that impairs the company’s net assets, and a stock’s diminishing potential given declining competitiveness due to a change of business environment or failure of business strategy.

Performance

In terms of the sector allocation strategy during the fiscal year ended February 28, 2022, overweight positions in the Iron and Steel sector and Banks sector generated the largest positive contributions. Sector returns were eroded by an underweight position in the Electric Appliances sector.

Relative performance was positively impacted by C. Uyemura & Co., Ltd. in the Chemicals sector, Ryoden Corporation in the Wholesale Trade sector, and The Akita Bank,

Ltd. in the Banks sector. Conversely, relative performance was negatively impacted by Hi-Lex Corporation in the Transportation Equipment sector, Seria Co., Ltd. in the Retail Trade sector, and Godo Steel, Ltd. in the Iron and Steel sector.

Market Review

The Benchmark increased by 2.0% and outperformed the TOPIX index, which increased by 1.7% in local currency terms, for the fiscal year ended February 28, 2022. The Japanese stock market rose based on expectations for U.S. fiscal policy change in March 2021 and due to positive expectations for the incoming Japanese government following the resignation of former Prime Minister Yoshihide Suga in September 2021. However, during the fall of 2021 there were concerns about the debt build up in China's real estate market and supply chain disruption. The Japanese stock market declined over the fiscal year end given the U.S. Federal Reserve's tightening of monetary policy and geopolitical risks surrounding the conflict in Ukraine.

In March 2021, the Japanese stock market continued to advance, posting a fifth consecutive monthly gain since November 2020. The accelerating pace of the COVID-19 vaccination rollout, the passage of the American Rescue Act with its \$1.9 trillion fiscal stimulus, and expectations of additional longer-term infrastructure spending proposals in the U.S., further supported hopes of a global economic recovery. However, between April and August of 2021, the Tokyo stock market remained directionless.

Since April 2021, Japan has been lagging behind other developed countries in its COVID-19 vaccination rollout. Accelerating inflation in the U.S. sparked fears that the U.S. Federal Reserve would accelerate its policy tapering which would cause the Japanese stock market to decline. However since mid-May 2021, the Japanese stock market rebounded based on the strength of a continued recovery in exports boosting the manufacturing-related sectors and the acceleration of Japan's COVID-19 vaccination rollout to one million doses a day.

The Japanese stock market declined in the month of July 2021. The upsurge in Delta COVID-19 variant cases worldwide raised alarm among investors. In August 2021, the market rebounded from its July 2021 declines. Corporate earnings results for the quarter ended June 2021 were strong given the majority of companies exhibited solid earnings recoveries from the year before and managed to beat expectations easily.

In September 2021, Prime Minister Suga's unexpected resignation triggered a rally in Japanese stocks based on optimistic future policy expectations. Positive news of a steep drop in COVID-19 cases later paved the way for the lifting of emergency measures that also supported the markets. From October 2021 to December 2021, the Japanese stock market was dominated by weak developments. In addition to fears of a debt default by a major Chinese real estate company, the market's reception of incoming Prime Minister Fumio Kishida was muted, and the economic recovery remained on hold as supply chain disruption curtailed output.

The Japanese stock market declined in January 2022. At the December 2021 meeting of the U.S. Federal Open Market Committee, a broad consensus was emerging, which suggested that the U.S. Federal Reserve would raise interest rates and reduce assets in the near future. This led to a rise in U.S. long-term interest rates and a fall in the Japanese stock market. In particular, growth stocks, which are assumed to be more sensitive to rising interest rates, fell sharply. This was a significant positive factor for the Fund's performance, as it now underweights growth stocks in the small-cap market. Due to a resurgence of COVID-19 cases in Japan caused by the Omicron strain, there was a growing possibility that a quasi-state of emergency or priority measures to prevent the spread of the novel coronavirus could be applied to large cities such as Tokyo. Russia's confrontation with Europe and the U.S. over Ukraine led to greater risk aversion that also weighed on the equity markets. By the end of the fiscal year, concerns over rising oil prices and aggressive monetary tightening, with the U.S. Federal Reserve threatening to

raise interest rates in March 2022, were among the factors contributing to the decline. Stock markets rebounded slightly in February 2022, but expectations and uncertainty about the U.S. Federal Reserve and the war in Ukraine left the equity markets with a sense of standstill.

Outlook and Future Strategy

In the wake of an abnormally prolonged period of ultra-low interest rate policy, the equity market has at times reflected conditions resembling an asset bubble. It now appears that this 10 years of accumulated pressure could be released, causing major shifts in market conditions.

On the other hand, according to forecasts from Nomura Securities Co., Ltd., the market's average Price-to-Earnings ratio for both large-cap and small-cap stocks is currently around 13, so it does not appear overvalued. Judging from past experience, however, it is difficult to determine an appropriate market average Price-to-Earnings ratio since Price-to-Earnings valuations of around 10 are common during periods of both rising and high interest rates. This suggests that at the very least the market is likely to experience a period of polarization in terms of equity selection. The small-cap market has also been experiencing an increased preference for value stocks since late November 2021.

Since February 2022, the outperformance of small-cap value stocks has lessened. It has been argued that this could be a reaction to the heightened geopolitical risk from the Russia-Ukraine conflict which some believe might soften the U.S. Federal Reserve Board's conviction towards monetary tightening. However, rising inflation had been an ongoing trend long before the Russian invasion of Ukraine. Since then, the conflict and the resulting sanctions on Russia have added to the inflationary pressure. Over the long term, therefore, inflationary and monetary tightening trends are likely to continue.

The Fund remains bullish on the outlook for small-cap value stocks for the following reasons. First, there is still a wide gap between valuations of value and growth stocks which has expanded to a historical level. This gap will converge further due to the higher-than-expected global inflation trends and the corresponding rise in interest rates. Next, the negative impact of the COVID-19 pandemic on the stock market is expected to come to an end gradually. Unlike large-cap stocks, small-caps are heavily influenced by domestic demand and had been deprived of investor attention due to the specific impact of the COVID-19 pandemic on domestic spending. Although the Omicron variant has caused further outbreaks, the availability of COVID-19 vaccines and new treatments has reduced the number of severe cases, so hospitalization and mortality rates could continue to decline. Many companies are adapting to a "new normal" in terms of labor practices and lifestyles. This makes it plausible to state COVID-19 can gradually transition to becoming a manageable endemic illness like seasonal influenza.

Lastly, the Fund can find many small-cap value stocks with solid financial results, earnings bases, and growth potential among major niche companies across various industries. The fact that many stocks in this category have low beta could reflect their low-risk fundamentals. We believe a time will come when these stocks will be revalued.

The Fund appreciates your continuing support.

Sincerely,

A handwritten signature in black ink, appearing to read 'Yuichi Nomoto', with a long horizontal flourish extending to the right.

Yuichi Nomoto
President

JAPAN SMALLER CAPITALIZATION FUND, INC.

PERFORMANCE (Unaudited)

ANNUALIZED RETURNS AS OF FEBRUARY 28, 2022

	<u>1 Year</u>	<u>5 Year</u>	<u>10 Year</u>
Net Asset Value (a)	(5.4%)	4.6%	7.9%

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Japan Smaller Capitalization Fund, Inc.

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Japan Smaller Capitalization Fund, Inc. (the “Fund”), including the schedule of investments, as of February 28, 2022, and the related statement of operations for the year then ended, the statements of changes in net assets for the two years in the period then ended and the financial highlights for each of the three years in the period then ended and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund at February 28, 2022, the results of its operations for the year then ended, the changes in its net assets for the two years in the period then ended and its financial highlights for each of the three years in the period then ended, in conformity with U.S. generally accepted accounting principles.

The financial highlights for each of the two years in the period ended February 28, 2019 were audited by another independent registered public accounting firm whose report, dated April 26, 2019, expressed an unqualified opinion on those financial highlights.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of the Fund’s internal control over financial reporting. As part of our audit we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of February 28, 2022, by correspondence with the custodian and brokers. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

Ernst + Young LLP

We have served as the auditor of one or more Nomura investment companies since 2020.

JAPAN SMALLER CAPITALIZATION FUND, INC.

NOTES TO FINANCIAL STATEMENTS

1. Significant Accounting Policies

Japan Smaller Capitalization Fund, Inc. (the “Fund”) is registered under the Investment Company Act of 1940, as amended (the “Investment Company Act”), as a non-diversified, closed-end management investment company. The Fund was incorporated in Maryland on January 25, 1990 and investment operations commenced on March 21, 1990. The Fund’s investment objective is to seek long-term capital appreciation through investments primarily in smaller capitalization Japanese equity securities.

The accompanying financial statements have been prepared in accordance with United States (“U.S.”) generally accepted accounting principles (“GAAP”) and are stated in United States dollars. The Fund is an investment company that follows the accounting and reporting guidance in accordance with the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 *Financial Services – Investment Companies*. The following is a summary of the significant accounting and reporting policies used in preparing the financial statements.

(a) Valuation of Securities—Investments traded in the over-the-counter market are fair valued at the last reported sales price as of the close of business on the day the securities are being valued or, if none is available, at the mean of the bid and offer price at the close of business on such day or, if none is available, the last reported sales price. Portfolio securities which are traded on stock exchanges are fair valued at the last sales price on the principal market on which securities are traded or, lacking any sales, at the last available bid price. Securities and other assets, including futures contracts and related options, that cannot be fair valued using one of the previously mentioned methods are stated at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund.

(b) Foreign Currency Transactions—Transactions denominated in Japanese yen (“Yen”) are recorded in the Fund’s records at the prevailing exchange rate at the time of the transaction. Asset and liability accounts that are denominated in Yen are adjusted to reflect the current exchange rate at the end of the period. Transaction gains or losses resulting from changes in the exchange rate during the reporting period or upon settlement of foreign currency transactions are included in the results of operations for the current period.

The net assets of the Fund are presented at the exchange rates and fair values on February 28, 2022. The Fund does isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held at February 28, 2022. Net realized gains or losses on investments include gains or losses arising from sales of portfolio securities and sales and maturities of short-term securities. Net realized gains or losses on foreign currency transactions arise from sales of foreign currencies, currency gains or losses realized on securities transactions between trade and settlement date, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund’s books and the U.S. dollar equivalent of the amounts actually received or paid.

JAPAN SMALLER CAPITALIZATION FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

(c) Security Transactions, Investment Income and Distributions to Shareholders—Security transactions are accounted for on the trade date. Dividend income and distributions are recorded on the ex-dividend dates and interest income is recorded on the accrual basis. Realized gains and losses on the sale of investments are calculated on the first in, first out basis.

Distributions from net investment income and net realized capital gains are determined in accordance with Federal income tax regulations, which may differ from U.S. GAAP. To the extent these “book/tax” differences are permanent in nature (i.e., that they result from other than timing of recognition—“temporary”), such accounts are reclassified within the capital accounts based on their Federal tax-basis treatment; temporary differences do not require reclassification.

Pursuant to a securities lending agreement with Brown Brothers Harriman & Co., the Fund may lend securities to qualified institutions. It is the Fund’s policy that, at origination, all loans shall be secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. It is the Fund’s policy that collateral equivalent to at least 100% of the fair value of securities on loan must be maintained at all times (when applicable). Collateral is provided in the form of cash, which would be invested in certain money market funds. The Fund is entitled to receive all income on securities loaned, in addition to a portion of the income earned as a result of the lending transaction. Although each security loan is fully collateralized, there are certain risks. On November 21, 2008, the Fund suspended its participation in the securities lending program. The Fund may resume its participation in the future. During the fiscal year ended February 28, 2022, the Fund did not earn any fees from lending fund portfolio securities, pursuant to the securities lending agreement.

(d) Income Taxes—A provision for U.S. income taxes has not been made since it is the intention of the Fund to continue to qualify as a regulated investment company under the Internal Revenue Code and to distribute within the allowable time limit all taxable income to its shareholders.

Under Japanese tax laws, a withholding tax is imposed on dividends at a rate of 15.315% and such withholding taxes are reflected as a reduction of the related revenue. The withholding tax rate of 15.315% was reduced to 10% upon the submission of Form 17 - Limitation on Benefits Article. There is no withholding tax on realized gains.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund’s tax positions taken or expected to be taken on federal and state income tax returns for all open tax years (the current and the prior three tax years), and has concluded that no provision for income tax is required in the Fund’s financial statements. The Fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the statement of operations. During the current year and for the prior three tax years, the Fund did not incur any interest or penalties.

(e) Use of Estimates in Financial Statement Preparation—The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

JAPAN SMALLER CAPITALIZATION FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

(f) Concentration of Risk—A significant portion of the Fund’s net assets consists of Japanese securities which involve certain considerations and risks not typically associated with investments in the U.S. In addition to the smaller size, and greater volatility, there is often substantially less publicly available information about Japanese issuers than there is about U.S. issuers. Future economic and political developments in Japan could adversely affect the value of securities in which the Fund is invested. Further, the Fund may be exposed to currency devaluation and other exchange rate fluctuations.

(g) Indemnifications—Under the Fund’s organizational documents, its officers and directors are indemnified against certain liabilities arising from the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of representations which provide general indemnifications. The Fund’s maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote and as such no additional accruals were recorded on the Statement of Assets and Liabilities.

2. Management Agreement and Transactions With Affiliated Persons

Nomura Asset Management U.S.A. Inc. (“NAM-U.S.A.” or the “Manager”) acts as the Manager of the Fund pursuant to a management agreement. Under the management agreement, the Manager provides all office space, facilities and personnel necessary to perform its duties. Pursuant to such management agreement, the Manager has retained its parent company, Nomura Asset Management Co., Ltd. (“NAM” or the “Investment Adviser”), as Investment Adviser to the Fund.

As compensation for its services to the Fund, the Manager receives a monthly fee at the annual rate of 1.10% of the value of the Fund’s average weekly net assets not in excess of \$50 million, 1.00% of the Fund’s average weekly net assets in excess of \$50 million but not exceeding \$100 million, 0.90% of the Fund’s average weekly net assets in excess of \$100 million but not exceeding \$175 million, 0.80% of the Fund’s average weekly net assets in excess of \$175 million but not exceeding \$250 million, 0.70% of the Fund’s average weekly net assets in excess of \$250 million but not exceeding \$325 million, 0.60% of the Fund’s average weekly net assets in excess of \$325 million but not exceeding \$425 million and 0.50% of the Fund’s average weekly net assets in excess of \$425 million. Under the management agreement, the Fund incurred fees to the Manager of \$2,574,121 for the fiscal year ended February 28, 2022. Under the investment advisory agreement, the Investment Adviser earned investment advisory fees of \$1,144,262 from the Manager, not the Fund, for the fiscal year ended February 28, 2022. At February 28, 2022, the management fee payable to the Manager by the Fund was \$179,772.

Certain officers and/or directors of the Fund are officers and/or directors of the Manager. Affiliates of Nomura Holdings, Inc. (the Manager’s indirect parent) did not earn any fees in commissions on the execution of portfolio security transactions for the fiscal year ended February 28, 2022. The Fund pays each Director not affiliated with the Manager an annual fee of \$30,000. In addition, the Fund pays each Director not affiliated with the Manager \$3,000 per in-person or virtually held meeting attended, \$2,000 per telephone meeting attended, and Director expenses related to attendance at meetings. The Chairman of the Board, presently Rodney A. Buck, is paid an additional annual fee of

JAPAN SMALLER CAPITALIZATION FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

\$8,000. The Chairman of the Audit Committee, presently David B. Chemidlin, is paid an additional annual fee of \$4,000. Such fees and expenses for unaffiliated Directors aggregated \$222,644 for the fiscal year ended February 28, 2022.

3. Purchases and Sales of Investments

Purchases and sales of investments, exclusive of foreign currency and investments in short-term securities, for the fiscal year ended February 28, 2022 were \$75,365,240 and \$90,864,101, respectively.

4. Federal Income Tax

As of February 28, 2022, net unrealized depreciation on investments, exclusive of foreign currency, for federal income tax purposes was \$31,586,559, of which \$15,350,404 related to appreciated securities and \$46,936,963 related to depreciated securities. The cost of investments, exclusive of foreign currency of \$1,157,040, at February 28, 2022 for federal income tax purposes was \$283,774,563.

At February 28, 2022, the components of accumulated earnings on a tax basis consisted of unrealized depreciation on investments and foreign currency transactions of \$31,580,367 and late year loss deferral of \$2,661,659. The differences between book basis and tax basis for unrealized appreciation on investments and foreign currency transactions are attributable to the tax deferral of losses on wash sales and the tax treatment of passive foreign investment companies.

The Fund paid an ordinary income distribution of \$14,033,778, which represents \$0.4953 per share and a long-term capital gains distribution of \$3,139,395 which represents \$0.1108 per share, to shareholders of record as of December 17, 2021. The distribution was paid on December 28, 2021.

The Fund paid an ordinary income distribution of \$3,629,572, which represents \$0.1281 per share and a long-term capital gains distribution of \$6,120,121 which represents \$0.2160 per share to shareholders of record as of December 18, 2020. The distribution was paid on December 28, 2020.

Certain losses realized during the current fiscal year may be deferred and treated as occurring on the first day of the following fiscal year for federal income tax purposes. For the fiscal year ended February 28, 2022, the Fund incurred and elected to defer net ordinary and capital losses as follows:

Short-term capital loss deferral	\$ 725,503
Long-term loss capital deferral	1,774,074
Late year ordinary loss deferral	<u>162,082</u>
	<u>\$2,661,659</u>

JAPAN SMALLER CAPITALIZATION FUND, INC.

NOTES TO FINANCIAL STATEMENTS (Continued)

5. Fair Value Measurements

In accordance with U.S. GAAP, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP also establishes a frame work for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

- Level 1 — quoted prices in active markets for identical investments
- Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

At February 28, 2022, all of the Fund's investments were determined to be Level 1 securities.

During the fiscal year ended February 28, 2022, the Fund did not hold any instrument which used significant unobservable inputs (Level 3) in determining fair value.

6. Subsequent Events

The Fund has evaluated subsequent events through the date the financial statements were issued, and has determined that there were no subsequent events that require recognition or disclosure in the financial statements.

JAPAN SMALLER CAPITALIZATION FUND, INC.

FINANCIAL HIGHLIGHTS

JAPAN SMALLER CAPITALIZATION FUND, INC.

SUPPLEMENTAL SHAREHOLDER INFORMATION (Unaudited)

The 2021 Annual Meeting of the Shareholders of the Fund was held in virtual meeting format on November 22, 2021. The purpose of the meeting was (1) to elect five Directors to serve for a term of one year and (2) to transact such other business as may properly come before the Meeting or any adjournment or postponement thereof.

At the meeting, Rodney A. Buck, David B. Chemidlin, Marcia L. MacHarg and Yuichi Nomoto were re-elected and Paige P. Ouimet was elected to serve as Directors of the Fund for a term expiring at the Annual Meeting of Shareholders to be held in 2022 and until their successors are duly elected and qualify. The results of the voting at the Annual Meeting were as follows:

1. To elect five Directors:

	<u>Shares Voted For</u>	<u>% of Outstanding Shares</u>	<u>Shares Voted Withhold Authority</u>	<u>% of Outstanding Shares</u>	<u>Shares Abstained</u>	<u>Broker Non-Vote</u>
Rodney A. Buck	21,278,468	75.10%	4,721,549	16.66%	—	—
David B. Chemidlin	21,299,659	75.17%	4,700,359	16.59%	—	—

INTERESTED DIRECTOR

Name, Age, Position(s) Held with the Fund,
Length of Service, Other Directorships Held
by Director, Number of Portfolios in Fund
Complex/Outside Fund Complexes Currently
Overseen by Director

Principal Occupation(s) During Past 5 Years:

Yuichi Nomoto (49)*

President and Director

President and Director since: 2019

Director of one fund in the Fund complex

President and Chief Executive Officer of NAM-U.S.A. and Director of Nomura Corporate Research and Asset Management Inc. (“NCRAM”) since 2019; Managing Director of NAM-U.S.A. since 2018; Head of Client Services and Marketing of NAM-U.S.A. from 2016-2020; Executive Director of NAM-U.S.A. from 2016-2018; Head of Investment Trust Marketing Department of NAM from 2014-2016.

* Mr. Nomoto is an “interested person,” as defined in the Investment Company Act, of the Fund based on his positions with NAM-U.S.A. and NAM.

Committees and Directors’ Meetings. The Board of Directors has a standing Audit Committee, a standing Nominating Committee, and a standing Governance and Compliance Committee, each of which consists of the Directors who are not “interested persons” of the Fund within the meaning of the Investment Company Act and are “independent” as defined in the New York Stock Exchange listing standards. Currently, Rodney A. Buck, David B. Chemidlin, Marcia L. MacHarg, and Paige P. Oiumet are members of these Committees. The Fund has no standing Compensation Committee.

During the fiscal year ended February 28, 2022, the Board of Directors (or the Independent Directors of the Fund meeting as a group) held six meetings, the Audit Committee held two meetings, and the Nominating Committee held three meetings. The Governance and Compliance Committee met as part of each quarterly meeting of the Board of Directors. Each incumbent director attended at least 75% of the aggregate number of meetings of the Board of Directors held during the period for which they served and, if a member, of the aggregate number of meetings of the Audit and Nominating Committees held during the period for which they served.

JAPAN SMALLER CAPITALIZATION FUND, INC.

INVESTMENT OBJECTIVE AND POLICIES (Unaudited)

The investment objective of the Fund is long-term capital appreciation through investments in Japanese smaller capitalization companies. The Fund's investment policy is to invest, under normal market conditions, at least 80% of its total assets in smaller capitalization Japanese equity securities traded on the Tokyo, Osaka, Nagoya and JASDAQ Stock Exchanges and the Mothers, and Centrex markets and included or traded on other indices or markets, as applicable, determined by the Investment Adviser to be appropriate indices or markets, for smaller capitalization companies in Japan ("Smaller Capitalization Companies"). Neither the Fund's investment objective nor its investment policy may be changed without the approval of the holders of a majority of the outstanding Shares. A majority vote, as defined by the 1940 Act, means the affirmative vote of the lesser of (i) 67% of the shares represented at a meeting at which more than 50% of the outstanding shares are represented, or (ii) more than 50% of the outstanding shares.

Under normal market conditions, at least 80% of the Fund's total assets are invested in equity securities of Smaller Capitalization Companies. Currently, the Investment Adviser considers Smaller Capitalization Companies to be those companies whose equity securities are included, at the time of purchase, in the Russell/Nomura Small Cap™ Index and certain other companies described below that are not represented in the Russell/Nomura Small Cap™ Index. The Russell/Nomura Small Cap™ Index measures the performance of small companies (in terms of adjusted market capitalization) and as of February 28, 2022 consists of 1,198 of the equity securities of the smallest companies included in the Russell/Nomura Total Index, representing the bottom 15% of the total market capitalization of the Russell/Nomura Total Market™ Index. The Russell/Nomura Total Market™ Index as of February 28, 2022 is comprised of 1,498 of the largest Japanese equity securities as determined by total market capitalization (in terms of adjusted market capitalization) and measures the performance of the broad Japanese equity market. Companies representing the bottom 2% of the total Japanese equity market (in terms of adjusted market capitalization) are not included in the Russell/Nomura Total Index and therefore are not included in the Russell/Nomura Small Cap™ Index. However, because the companies that belong to this bottom 2% have small market capitalizations, the Investment Adviser considers these companies to be Smaller Capitalization Companies. As of February 28, 2022, the largest of the Smaller Capitalization Companies in the Russell/Nomura Total Index has an approximate market capitalization of 668 billion Yen which is approximately 5.8 billion in U.S. dollars terms. The market capitalizations of companies in the Russell/Nomura Small Cap™ Index change with market conditions and the composition of the Russell/Nomura Small Cap™ Index.

The Fund may invest its assets in a broad spectrum of industries. The Fund seeks to identify and invest in companies it believes offer potential for long-term capital appreciation. In evaluating prospective investments, the Investment Adviser utilizes internal financial, economic and credit analysis resources as well as information obtained from other sources. In selecting industries and companies for investment, the Investment Adviser considers overall growth prospects, financial conditions, competitive position, technology, research and development, productivity, labor costs and sources, profit margins, return on investment, structural changes in local economies, capital resources, the degree of government regulation or deregulation, management and other factors. There can be no assurance that the Fund will realize its investment objective.

Securities of Smaller Capitalization Companies are traded in a number of separate markets in Japan that have been developed in response to increased attention to this section of the securities market. At the time the Fund commenced operations in 1990, securities of emerging Japanese companies were traded primarily on the Japanese over-the-counter market and securities of these companies were not generally eligible for listing on major securities exchanges.

JAPAN SMALLER CAPITALIZATION FUND, INC.

INVESTMENT OBJECTIVE AND POLICIES (Continued) (Unaudited)

The Fund has adopted certain other policies as set forth below:

Assets Not Invested in Smaller Capitalization Companies, Other than Cash. The Fund invests any assets not invested in Smaller Capitalization Companies, other than cash, in fixed-income securities. These fixed-income securities include non-convertible preferred stock, debt securities, obligations issued or guaranteed by the U.S. or Japanese government or their agencies or instrumentalities and money market instruments (such as short term obligations issued or guaranteed by the U.S. or Japanese government, commercial paper and time deposits, certificates of deposit and bankers' acceptances of U.S. or Japanese banks).

Repurchase Agreements. Repurchase agreements are contracts pursuant to which the seller of a security agrees at the time of sale to repurchase the security at an agreed upon date and price in a specified currency, thereby determining the yield during the term of the agreement. When the Fund enters into a repurchase agreement, the seller is required to maintain the value of the securities subject to the repurchase agreement, marked to market daily, at not less than their repurchase price. This results in a fixed rate of return for the Fund that is insulated from market fluctuation during such period although the rate of return may be affected by currency fluctuations.

Lending Portfolio Securities. In order to increase income, the Fund is authorized to lend portfolio securities from time to time to brokers, dealers and financial institutions and receive collateral in the form of cash or U.S. government securities. The Fund currently has suspended its securities lending program but may resume participation in the future. Under the Fund's procedures, collateral for such loans must be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities (including interest accrued on the loaned securities). The interest accruing on the loaned securities will be paid to the Fund, and the Fund will have the right, on demand, to call back the loaned securities. The Fund may pay fees to arrange the loans. The Fund will neither lend portfolio securities in excess of 30% of the values of its assets nor lend its portfolio securities to any officer, director, employee or affiliate of the Fund, the Manager or the Investment Adviser. Although the Fund is authorized to lend portfolio securities, it does not currently do so. However, it may resume the practice at any time.

Borrowings. The Fund is authorized to borrow money in amounts of up to 10% of the value of its total assets at the time of such borrowings.

Hedging Foreign Currency. The Fund is authorized to deal in forward foreign exchange between the U.S. dollar and the Yen as a hedge against possible variations in the foreign exchange rate between these currencies. This is accomplished through contractual agreements to purchase or sell a specified currency at a specified future date (up to one year) and price at the time of the contract. The Fund's dealings in forward foreign exchange are limited to hedging involving either specific transactions or portfolio positions. The Fund does not intend to utilize hedging techniques to a significant extent.

The Fund is also authorized to purchase or sell listed or over the counter foreign currency options, foreign currency futures and related options on foreign currency futures as a short or long hedge against possible variations in foreign exchange rates. Such transactions may be effected with respect to hedges on non-U.S. dollar-denominated securities owned by the Fund, sold by the Fund but not yet delivered, or committed or anticipated to be purchased by the Fund.

Hedging against a decline in the value of a currency does not eliminate fluctuations in the prices of portfolio securities or prevent losses if the prices of such securities decline, and it precludes the opportunity for gain if the value of the hedged currency should rise. Moreover, it may not be possible for the Fund to hedge against a devaluation that is so

JAPAN SMALLER CAPITALIZATION FUND, INC.

INVESTMENT OBJECTIVE AND POLICIES (Continued) (Unaudited)

generally anticipated that the Fund is not able to contract to sell the currency at a price above the devaluation it anticipates. The cost to the Fund of engaging in foreign currency transactions varies with such factors as the currency involved, the length of the contract period and the market conditions then prevailing. Since transactions in foreign currency exchange are usually conducted on a principal basis, no fees or commissions are involved.

JAPAN SMALLER CAPITALIZATION FUND, INC.

RISK FACTORS AND SPECIAL CONSIDERATIONS (Unaudited)

Risks of Investing in Equity Securities

Common and preferred stocks represent equity ownership in a company. Stock markets are volatile. The price of equity securities will fluctuate and can decline and reduce the value of a portfolio investing in equities. The value of equity securities purchased by the Fund could decline if the financial condition of the companies the Fund invests in declines or if overall market and economic conditions deteriorate. The value of equity securities may also decline due to factors that affect a particular industry or industries or due to general market conditions that are not specifically related to a company or industry, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or generally adverse investor sentiment.

One or more markets in which the Fund invests may go down in value, with the possibility that the markets will go down sharply and unpredictably. The value of a security or other asset may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or factors that affect a particular issuer or issuers, exchange, country, group of countries, region, market, industry, group of industries, sector or asset class. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues like pandemics or epidemics, recessions, or other events could have a significant impact on the Fund and its investments. Securities selected by Fund management may underperform the markets, the relevant indices or the securities selected by other funds with similar investment objectives and investment strategies.

A recent outbreak of an infectious coronavirus has developed into a global pandemic that has resulted in numerous disruptions in the market and has had significant economic impact leaving general concern and uncertainty. The impact of this coronavirus, and other epidemics and pandemics that may arise in the future, could affect the economies of many nations, individual companies and the market in general ways that cannot necessarily be foreseen at the present time.

Risks of Investing in Japan

General. There are special risks associated with investments in Japan and the value of the Fund's shares may vary widely in response to political and economic factors affecting companies in Japan. Political, social or economic disruptions in Japan or in other countries in the region may adversely affect the values of Japanese securities and thus the Fund's holdings.

Japan's economy could be negatively impacted by many factors, including rising interest rates, tax increases and budget deficits. In the longer term, Japan will have to address the effects of an aging population, such as a shrinking workforce and higher welfare costs. To date, Japan has had restrictive immigration policies that, combined with other demographic concerns, appear to be having a negative impact on the economy. Japan's growth prospects appear to be dependent on its export capabilities. Japan's neighbors, in particular China, have become increasingly important export markets. Despite a deepening in the economic relationship between Japan and China, the countries' political relationship has at times been strained in recent years. Should political tension increase, it could adversely affect the economy, especially the export sector, and destabilize the region as a whole. Japan also remains heavily dependent on oil imports, and higher commodity prices could therefore have a negative impact on the economy. Japan is located in a region that is susceptible to natural disasters, which could also negatively impact the Japanese economy.

JAPAN SMALLER CAPITALIZATION FUND, INC.

RISK FACTORS AND SPECIAL CONSIDERATIONS (Continued) (Unaudited)

The growth of Japan's economy historically has lagged that of its Asian neighbors and other major developed economies. The Japanese economy is heavily dependent on international trade and has been adversely affected by trade tariffs, other protectionist measures, competition from emerging economies, and the economic conditions of its trading partners. Japan's neighbors, in particular China, have become increasingly important export markets. Despite a deepening in the economic relationship between Japan and China, the countries' political relationship has at times been strained. Should political tension increase, it could adversely affect the economy, especially the export sector, and destabilize the entire Asian region.

Currency Risks. The value of the Fund's securities as measured in U.S. dollars may be affected by fluctuations in the value of the Yen relative to the U.S. dollar. The Yen has shown volatility over the past two decades. Such volatility could affect returns in the future. The Yen may also be affected by currency volatility elsewhere in Asia, especially Southeast Asia. Depreciation of the Yen will decrease the value of the Fund's holdings. Japan has, in the past, intervened in the currency markets to attempt to maintain or reduce the value of the Yen. Japanese intervention in the currency markets could cause the value of the Yen to fluctuate sharply and unpredictably and could cause losses to investors.

The Fund's assets will be invested principally in securities of Japanese issuers and substantially all of the income received by the Fund will be in Yen. However, the Fund will compute and distribute its income in U.S. dollars. Currency exchange rate fluctuations can decrease or eliminate income available for distribution. For example, if the value of the Yen falls relative to the U.S. dollar between the earning of the income and the time at which the Fund converts the Yen to U.S. dollars, the Fund may be required to liquidate securities in order to make distributions if the Fund has insufficient cash in U.S. dollars to meet distribution requirements. Furthermore, the Fund may incur costs in connection with conversions between U.S. dollars and the Yen.

The Fund's ability to hedge against foreign currency risks may adversely affect the Fund's net asset value. The Fund may engage in a variety of foreign currency exchange transactions. Hedging involves special risks, including possible default by the other party to the transaction, illiquidity and, to the extent the Investment Adviser's view as to certain market movements is incorrect, the risks that the use of hedging could result in losses greater than if they had not been used.

Regulatory and Judicial Risks. Issuers in Japan are subject to accounting, auditing and financial standards and requirements that differ, in some cases significantly, from those applicable to U.S. issuers. In particular, the assets and profits appearing on the financial statements of a Japanese issuer may not reflect its financial position or results of operations in the way they would be reflected had such financial statements been prepared in accordance with U.S. generally accepted accounting principles.

Legal principles relating to corporate affairs and the validity of corporate procedures, directors' fiduciary duties and liabilities and shareholders' rights for issuers in Japan may differ from those that may apply in the U.S. Shareholders' rights under Japanese law may not be as extensive as those that exist under the laws of the U.S. The Fund may therefore have more difficulty asserting its rights as a shareholder of a Japanese company in which it invests than it would as a shareholder of a comparable U.S. company.

It may be difficult for the Fund to obtain a judgment in a court outside the U.S. with respect to any claim that the Fund may have against any such issuer or its directors and officers. As a result, even if the Fund initiates a suit against the issuer in a U.S. court, it may be difficult for the Fund to effect service of process in Japan. Moreover, if the Fund obtains a judgment in a U.S. court, it may be difficult to enforce such judgment in Japan.

JAPAN SMALLER CAPITALIZATION FUND, INC.

RISK FACTORS AND SPECIAL CONSIDERATIONS (Continued) (Unaudited)

The Investment Adviser is a Japanese corporation with its principal place of business in Tokyo, Japan. Therefore, it may not be possible for shareholders to effect service of process within the U.S. upon the Investment Adviser or to enforce against the Investment Adviser, in U.S. courts or foreign courts, judgments obtained in U.S. courts predicated upon the civil liability provisions of the federal securities laws of the U.S. In addition, it is not certain that a foreign court would enforce, in original actions, liabilities against the Investment Adviser predicated solely upon the securities laws of the U.S.

The Fund may hold its foreign securities and cash in foreign banks and securities depositories. There may be less regulatory oversight over their operations than in the case of U.S. financial institutions. Also, certain Japanese laws may put limits on the Fund's ability to recover its assets if a foreign bank, depository or issuer of a security, or any of their agents, goes bankrupt.

Concentration Risk. From time to time, the Fund may invest a greater proportion of its assets in the securities of companies that are part of specific sectors and related industries of the Japanese economy. The Fund is therefore subject to greater risk of loss with respect to its portfolio securities as a result of its focus on such sectors and related industries.

Investing in a significantly reduced number of issuers may result in greater performance volatility, as the Fund will be more exposed to the risks associated with and developments affecting an individual issuer than if the Fund's investments were less concentrated.

Risks of Investing in Smaller Capitalization Companies

The Fund invests a substantial portion of its assets in the securities of smaller capitalization companies in Japan. Investments in the securities of these companies may present greater opportunities for growth, but also involve greater risks than are customarily associated with investments in securities of more established and larger capitalized companies. The securities of smaller capitalization companies have fewer market makers and wider price spreads, which may in turn result in more abrupt and erratic market price movements and make the Fund's investments more vulnerable to adverse general market or economic developments than would investments only in large, more established Japanese companies. It is more difficult to obtain information about smaller capitalization companies because they tend to be less well known and have shorter operating histories and because they tend not to have significant ownership by large investors or be followed by many securities analysts. Additionally, these companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group that may lack depth and experience. Investments in larger and more established companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, more stability and greater depth of management and technical personnel.

Additional Risks

War, terrorism, geopolitical uncertainties, public health issues and other business interruptions have caused and could cause damage or disruption to international commerce and the global economy, and thus could have a material adverse effect on the Fund. The Fund's business operations are subject to interruption by, among others, natural disasters, whether as a result of climate change or otherwise, fire, power shortages, nuclear power plant accidents and other industrial accidents, terrorist attacks and other hostile acts, labor disputes, public health issues and other events beyond its control. Should major public health issues, including pandemics, arise, the Fund could be adversely affected by market downturns.

JAPAN SMALLER CAPITALIZATION FUND, INC.

TAX INFORMATION (Unaudited)

We are required by subchapter M of the Internal Revenue Code of 1986, as amended, to advise you within 60 days of the Fund's fiscal year ended February 28, 2022 as to the federal tax status of distributions received by shareholders during such fiscal year. Accordingly, the Fund designates \$713,445 as foreign tax credit with the associated foreign gross income of \$7,134,439.

Shareholders should not use the above information to prepare their tax returns. The information necessary to complete your income tax returns will be included with your Form 1099 DIV which was sent to you separately in January 2022.

REVIEW OF THE FUND'S MARKET PRICE COMPARED TO NET ASSET VALUE (Unaudited)

Shares of closed-end investment companies, including funds focusing on a single country, have at various times traded at both premiums and discounts to their net asset value ("NAV"). Although the shares of the Fund have traded at such a premium, they also have traded at a discount from NAV.

Since the Fund was established, the Board of Directors on a quarterly basis has reviewed the market price of the Fund's shares. The purpose of such review has been to determine whether a discount exists and, if so, whether it would be in the shareholders' overall best interests for the Fund to conduct share repurchases, make an issuer tender offer for shares or consider another means of possibly reducing the discount. For example, the Board of Directors has also considered whether it would be in the best interests of the Fund to convert to an open-end fund or to an interval fund, which is a form of investment company that makes periodic share repurchases at prices based on NAV.

In addition, on May 26, 2016, the Board of Directors approved a Discount Management Plan. Under the plan, the Fund is authorized to make open-market share repurchases on the New York Stock Exchange. Such repurchases may be made from time to time as authorized by the Board of Directors.

To date, the Board of Directors has not authorized open-market share repurchases or a tender offer for shares of the Fund. The Board of Directors also has not felt that it would be in the best interests of the Fund or its shareholders to convert to an open-end fund or an interval fund. As a "country fund" emphasizing a smaller capitalization segment of the market, the Fund's NAV is more volatile than might be the case for a fund with a broader investment focus. The Board of Directors believes that converting the Fund to either an open-end or interval fund would subject the Fund to redemptions or repurchases at times when liquidation of portfolio securities could disadvantage remaining shareholders, and the Directors believe that the recent volatility of the financial markets in Japan supports their view. Additionally, since an open-end fund has a limited ability to invest in illiquid securities, such a conversion could hinder the Fund's ability to pursue its investment objectives. The Board of Directors intends to continue to review, on a quarterly basis, the trading market for the Fund's shares.

JAPAN SMALLER CAPITALIZATION FUND, INC.

BOARD REVIEW OF THE MANAGEMENT AND INVESTMENT ADVISORY AGREEMENTS (Unaudited)

The Board of Directors of the Fund (the “Board”) consists of five directors, four of whom are independent or non-interested directors (the “Independent Directors”). The Board considers matters relating to the Fund’s management and investment advisory agreements throughout the year. On an annual basis, the Board specifically considers whether to approve the continuance of these agreements for an additional one-year period. The specific agreements (the “Agreements”) consist of the Fund’s management agreement with Nomura Asset Management U.S.A. Inc. (the “Manager”) and the investment advisory agreement between the Manager and its parent, Nomura Asset Management Co., Ltd. (the “Investment Adviser”).

The Board, including the Independent Directors, most recently approved the continuance of the Agreements at a meeting held on November 22, 2021. In connection with their deliberations at that meeting and at a separate meeting of the Independent Directors held on November 11, 2021, the Independent Directors received materials that included, among other items, information provided by the Manager including (i) copies of the Agreements and actions taken regarding such Agreements including approval history, (ii) a presentation on the Investment Adviser, the Fund’s investment strategy, Nomura Japan Small Cap Equity Strategy, and Other Accounts under Management, (iii) the organizational structure of the Investment Adviser and Manager including biographical information about the personnel performing management and investment advisory services for the Fund, (iv) responses to questionnaires from the Manager and the Investment Adviser concerning their respective resources, services they provide to the Fund, and other current matters, (v) the most current financial statements and profitability of the Manager and the Investment Adviser including the management fee paid by the Fund to the Manager and the advisory fee paid by the Manager to the Investment Adviser, (vi) historical performance of the Fund, performance of comparative small-cap funds, and performance of the Fund’s benchmark, (vii) historical fund and financial highlights and historical ratio of expenses to average net assets, (viii) an analysis of the management fee structure with comparative closed-end funds with Asia Equity strategies including assumed economies of scale, assets under management, and expense ratio. The Independent Directors were advised by, and received materials (including a detailed memorandum reviewing the applicable legal standards and factors to be taken into account in considering the renewal of investment management agreements, as set forth by the Supreme Court and other relevant court decisions) from their independent counsel in considering these matters and the continuance of the Agreements. Based on their discussion at their meeting on November 11, 2021, the Independent Directors requested additional information from the Manager. The Manager responded to these questions at the meeting held on November 22, 2021.

In considering the continuance of the Agreements at the meeting held on November 22, 2021, the Board, including the Independent Directors, did not identify any single factor as determinative. Matters considered by the Directors in connection with their review of the Agreements included the following:

The nature, extent and quality of the services provided to the Fund under the Agreements. The Board considered the nature, extent and quality of the services provided to the Fund by the Manager and the Investment Adviser and the resources dedicated by the Manager and the Investment Adviser. These services included both investment advisory services and related services such as the compliance oversight provided by the Manager. Based on its review of all of the services provided by the Manager and the Investment Adviser, the Board, including the Independent Directors, concluded that the nature, extent and quality of these services supported the continuance of the Agreements.

Performance. The Board considered performance information provided by the Manager regarding the Fund’s performance over a number of time periods, including the

JAPAN SMALLER CAPITALIZATION FUND, INC.

BOARD REVIEW OF THE MANAGEMENT AND INVESTMENT ADVISORY AGREEMENTS (Continued) (Unaudited)

three-month, year to date, one-year, three-year, five-year, and ten-year periods ended September 30, 2021. The Manager provided information about the performance of the Fund compared to the Fund's benchmark and comparative small-cap funds, Fund highlights and Fund financial highlights for the last three fiscal year ends, data on the Fund's expense ratio and summary of expenses for the last semi-annual period and prior five fiscal year ends, and comparative management fee structure, expense ratio, and other information on other closed-end funds with Asian Equity strategies.

The costs of the services to be provided and the profits to be realized by the Manager and its affiliates from their advisory relationships with the Fund. The Board considered the fee under the Fund's management agreement in connection with other information provided for the Directors' consideration. The Board considered information provided by the Manager regarding fees charged by the Manager and its affiliates to institutional accounts and other investment companies having investment objectives similar to the Fund's investment objective, including Japanese retail unit trusts. The Board recognized that the nature of the services provided by the Manager and the Investment Adviser to other investment vehicles and separate accounts differed from the range of services provided to the Fund.

The Manager also provided the Board with information prepared by the Manager and the Investment Adviser indicating the profitability of the Agreements to these respective advisers. This presentation included information regarding methodologies used to allocate expenses in considering the profitability of the Agreements to the Manager and the Investment Adviser. The Independent Directors reviewed this information with the Manager to understand expense allocation methodology utilized by the Investment Adviser.

After reviewing the information described above including investment performance and fee structures of comparative funds, the Independent Directors concluded that the management fee proposed to be charged to the Fund was reasonable and the profitability of the Agreements to the Manager and the Investment Adviser supported the continuance of the Agreements.

Based on an evaluation of all factors deemed relevant, including the factors described above and taking into account information received throughout the preceding year, the Board, including each of the Independent Directors, concluded that each of the Agreements should be continued through December 31, 2022.

JAPAN SMALLER CAPITALIZATION FUND, INC.

DIVIDEND REINVESTMENT PLAN (Unaudited)

The Dividend Reinvestment Plan (the “Plan”) is available automatically for any holder of Common Stock with shares registered in his/her own name who wishes to purchase additional shares with income dividends or long-term capital gain distributions received on shares owned, unless such shareholder elects to receive all dividends and capital gain distributions in cash, paid by check and mailed to the shareholder. If a shareholder holds shares in his/her own name, communications regarding the Plan should be addressed to Computershare Trust Company, N.A., (the “Plan Agent”), P.O. Box 505000 Louisville, KY 40233. Under the Plan, shareholders appoint the Plan Agent to reinvest dividends and distributions in shares of the Fund. Such shares will be acquired by the Plan Agent for shareholders either through open market purchases if the Fund is trading at a discount or through the issuance of authorized but unissued shares if the Fund is trading at net asset value or a premium. If the market price of a share on the payable date of a dividend or distribution is at or above the Fund’s net asset value per share on such date, the number of shares to be issued by the Fund to each shareholder receiving shares in lieu of cash dividends or distributions will be determined by dividing the amount of the cash dividends or distributions to which such shareholder would be entitled by the greater of the net asset value per share on such date or 95% of the market price of a share on such date. If the market price of a share on such distribution date is below the net asset value per share, the number of shares to be issued to such shareholders will be determined by dividing such amount, less brokerage commission, by the per share market price.

Purchases will be made by the Plan Agent from time to time on the New York Stock Exchange (the “Exchange”) or elsewhere to satisfy dividend and distribution investment requirements under the Plan. Purchases will be suspended on any day when the closing price (or the mean between the closing bid and ask prices if there were no sales) of the shares on the Exchange on the preceding trading day was higher than the net asset value per share. If on the dividend payable date, purchases by the Fund are insufficient to satisfy dividend or distribution investments and on the last trading day immediately preceding the dividend payable date the closing price or the mean between the closing bid and ask prices of the shares is lower than or the same as the net asset value per share, the Plan Agent will continue to purchase shares until all investments by shareholders have been completed or the closing price or the mean between the bid and ask prices of the shares becomes higher than the net asset value, in which case the Fund will issue the necessary additional shares from authorized but unissued shares. If on the last trading day immediately preceding the dividend payable date, the closing price or the mean between the bid and ask prices of the shares is higher than the net asset value per share and if the number of shares previously purchased on the Exchange or elsewhere is insufficient to satisfy dividend investments, the Fund will issue the necessary additional shares from authorized but unissued shares. There will be no brokerage charges with respect to shares issued directly by the Fund to satisfy the dividend investment requirements. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Fund’s open market purchases of shares. In each case, the cost per share of shares purchased for each shareholder’s account will be the average cost, including brokerage commissions, of any shares purchased in the open market plus the cost of any shares issued by the Fund. For the fiscal year ended February 28, 2022, the Fund issued no new shares for dividend reinvestment purposes.

Shareholders who elect to hold their shares in the name of a broker or other nominee should contact such broker or other nominee to determine whether they may participate in the Plan. To the extent such participation is permitted, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the broker as representing the total amount registered in the shareholder’s name and held for the account of beneficial owners who are participating in such Plan. Shareholders that participate in

JAPAN SMALLER CAPITALIZATION FUND, INC.

DIVIDEND REINVESTMENT PLAN (Continued) (Unaudited)

the Plan holding shares in a brokerage account may not be able to transfer the shares to another broker and continue to participate in the Plan. Shareholders who are participating in the Plan may withdraw from the Plan at any time.

There will be no penalty for withdrawal from the Plan, and shareholders who have previously withdrawn from the Plan may rejoin it at any time. Changes in participation in the Plan should be made by contacting the Plan Agent if the shares are held in the shareholder's own name and must be in writing and should include the shareholder's name and address as they appear on the account registration. If the shares are held in the name of a broker or other nominee, such person should be contacted regarding changes in participation in the Plan. Upon withdrawal from the Plan, the appropriate number of full shares will be reflected in the Fund records and a cash payment for any fractional shares will be issued. The shareholder may also request the Plan Agent to sell part or all of the shareholder's shares at the market price and remit the proceeds to the shareholder, net of any brokerage commissions. A \$2.50 fee plus \$0.15 per share sold will be charged by the Plan Agent upon any cash withdrawal or termination. An election to withdraw from the Plan will, until such election is changed, be deemed to be an election by a shareholder to take all subsequent distributions in cash. An election will be effective only for a dividend or distribution if it is received by the Plan Agent not less than 10 days prior to such record date.

The Plan Agent will maintain all shareholders' accounts in the Plan, and furnish written confirmation of all transactions in such account, including information needed by shareholders for tax records. Shares in the account of each Plan participant may be held by the Plan Agent in non-certificated form in the name of the participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan.

The automatic reinvestment of dividends will not relieve participants of any income taxes that may be payable (or required to be withheld) on such dividends. Shareholders receiving dividends or distributions in the form of additional shares pursuant to the Plan should be treated for Federal income tax purposes as receiving a distribution in an amount equal to the amount of money that the shareholders receiving cash dividends or distributions will receive and should have a cost basis in the shares received equal to such amount.

The Fund reserves the right to amend or terminate the Plan as applied to any dividend paid subsequent to written notice of the change sent to participants in the Plan at least 90 days before the record date for such dividend. There is no service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. All correspondence concerning the Plan, including requests for additional information about the Plan, should be directed to the Trust Company, at Computershare Trust Company, N.A. P.O. Box 505000 Louisville, KY 40233.

BOARD OF DIRECTORS

Rodney A. Buck
